Invoke Public Sector is a **Small Business Entity (SBE)** specializing in **AI services and digital transformation** for the **federal government and critical infrastructure sectors**. We help agencies transform how work is performed through automation, data-driven insight, and next-generation technology partnerships that deliver measurable impact and cost savings.

No code/Low Code Application Development

We build secure, scalable applications and contractor assurance systems using platforms including **Ideagen, DevonWay, Appian** and **Power Platform**—enabling rapid delivery of mission applications, digital workflows, and real-time data integration without customization.

Artificial intelligence

We design and integrate AI solutions—from **Large Language Models** to **predictive analytics**—that accelerate decision-making, automate complex analysis, and unlock mission-critical insights at speed and scale.

Intelligent Automation

We implement enterprise-grade automation using **UiPath, Power Automate**, and **AI agents** to eliminate manual work, improve accuracy, and deliver measurable performance gains across every functional area.

Agentic Code Modernization

We apply advanced AI agents to systematically **refactor and modernize legacy systems**, delivering secure, maintainable, and compliant code with unmatched speed and precision.
