INVOKE PUBLIC SECTOR

Intelligent Automation & Agentic AI for Federal Missions

Invoke Public Sector is a non-traditional small business delivering Intelligent Automation and Agentic AI to eliminate manual effort, modernize legacy systems, and accelerate mission outcomes. We transform fragmented workflows into automated, AI-driven mission capability. As the AI & RPA Partner to the USAF Center of Excellence, we build lasting government capability through Citizen Developer training, enablement, and support. Our proven track record across federal agencies spans RPA, Code Modernization, AI Enablement, No-Code/Low-Code Development, and large-scale Workflow Transformation. We move rapidly from concept to production and get the mission done.

3M+
Labor hours repurposed through automation

6,000+
Personnel trained in AI and RPA

1,000+
Automations supported across 100+ installations

$30M+
Saved by replacing manual effort with Intelligent Automation

CORE CAPABILITES

Intelligent Automation & RPA
- Discovery and assessment of manual, broken, and high-burden mission workflows
- End-to-end automation design, development, deployment, and sustainment across no-code, low-code, and full-code environments
- Business rules-driven automation with governance and enablement that build lasting government capability

Agentic Workflows & Mission Automation
- AI-driven workflow orchestration for taskers, routing, document handling, and decision support
- Automated processes connecting email, forms, enterprise systems, and collaboration platforms
- Human-in-the-loop designs with rapid delivery from concept to operational use

Code Modernization
- Assessment, documentation, and modernization of legacy applications and codebases
- AI-assisted analysis, dependency mapping, and refactoring pipelines that reduce risk and accelerate execution
- Traceable, validated outputs with living documentation from legacy to modernized state

Citizen Developer Enablement & AI Training
- Citizen Developer programs that help government teams identify, build, and sustain automations
- AI training and bootcamps for technical and functional audiences at all levels
- Coaching, roadshows, and communities of practice that drive durable adoption

Agentic Cyber Operations
- Agent-enabled cyber capabilities for offensive, defensive, and adversary-emulation operations
- Deployable across training, testing, and live mission environments
- High-fidelity environments and auditable architectures for controlled execution in sensitive environments

Case Management & Enterprise Applications
- Case management, workflow modernization, and compliance solutions for mission operations
- Chain-of-custody tracking, evidence management, and audit-ready process design
- Appian, Ideagen DevonWay, and enterprise application modernization for regulated environments

PAST PERFORMANCE

CITIZEN DEVELOPER PROGRAM
Enterprise training, coaching, and enablement program building organic automation capability across the DAF. **6,000+ trained · 1,000+ automations supported.**

USAF & USSF

BOUNCER BOT
Automated visitor identity scanning and real-time CJIS criminal background checks for installation access control. **~70% processing time reduction · Deployed at 12+ installations.**

USAF Security Forces

TRANSCRIPT AUTOMATION
AI-powered extraction with human-in-the-loop validation for high-volume academic record processing into SAP ERP. **Processed 10,000+ transcripts in under 60 minutes.**

Community College of the Air Force

AGENTIC CODE MODERNIZATION
Multi-agent AI platform that analyzes, documents, and refactors legacy codebases (including COBOL, C, JCL, IDEAL) into modernization-ready baselines, with full documentation, testing and traceability. **10M+ SLOC modernized.**

Air Force Life Cycle Management Center

CRIMINAL JUSTICE INFORMATION MANAGEMENT AND INDEXING
Secure case management platform for NICS submissions, firearm prohibitions, arrests, and dispositions with full business rule enforcement. **~90% application routing time reduction.**

Air Force Office of Special Investigations

DRUG TESTING CHAIN-OF CUSTODY
Standardized digital platform for specimen tracking, custody transfers, and corrective action management on Ideagen DevonWay. **Deployed in 5 DoD forensic toxicology laboratories.**

Defense Health Agency, Drug Demand Reduction Program

COMPANY INFORMATION

Status	Non-Traditional Small Business
UEI	C4CLBJLZLE13
CAGE	8CGH6
CMMC SPRS	110 (Level 2)
Compliance	SOC 2 - PCI
HQ	Atlanta, GA

NAICS CODES
541511 - Custom Computer Programming
541512 - Computer Systems Design Services
541519 - Other Computer Related Services
541611 - Admin & General Mgmt Consulting
611430 - Professional Development Training

Active Contract Vehicle
GOVERNMENT-WIDE · SINGLE AWARD

SBIR Phase III IDIQ for Intelligent Automation-as-a-Service (IAaaS)

FA877124D0003 · $47M Ceiling · Sep 2024–2029

Government-wide sole-source task orders to any federal agency. Flexible delivery order structure enables agile discovery, development, and deployment. On contract in as few as 6 days.

SCOPE
Robotic Process Automation | Code Modernization | Training & Workforce Enablement | Generative AI | Agentic AI | Business Process Management
